Quick Start Guide

IntelliGo i3 CGMS + IGO - Share App

- IntelliGo App on your smart phone receives your glucose data from Transmitter and displays your glucose information.

- IntelliGo App does not use internet (**offline**), and your personal information is only stored on your smart phone.

- iGO - Share App on your smart phone receives your glucose data from IntelliGo App and send data to the cloud server.

- iGO - Share App uses internet (**online**), and your personal information will be safely used after your consent to generate analysis reports and graphs for diabetes management.
